

# 'Making Waves'

## Microwave Pollution

### The Political and Corporate Abuse of Humanity and the Eco-System

On 15 March 2005, Karen Naismith Robertson of the North Dorset Green Party presented a national 'TETRA and Phone Mast Forum' in Gillingham, Dorset, UK. The event was filmed and made into a DVDROM to make the information available to the wider public.

The Forum was chaired by **Mike Bell of the 'Radiation Research Trust'** and the list of speakers included:

- Barrie Trower** Author of the 'Confidential Report for the Police Federation', bio-physicist and microwave weaponry expert
- Mike Clark** HPA spokesman (formerly the NRPB)
- John O'Brien** 'Tetrawatch' anti-TETRA spokesman
- Roger Coghill** Bioelectromagnetics researcher 'Coghill Research Laboratories'
- Chris Maile** Planning law expert 'Planning Sanity'
- Fiona Darroch** Barrister at Law for environmental and public interests

Unfortunately, Peter Sitch of O2 Airwave, and representatives from MOA, OFCOM and the Home Office, declined the invitation to take part.

Together the Speakers presented the audience with the latest planning law, human rights, environmental, political, medical and scientific views available.

Among the audience were officials from the Police Federation, the Fire Brigades Union, County and District level government departments responsible for finance and planning and several mast campaign groups.

**The DVDROM contains • an edited film of the speakers' presentations with an index of subheadings to provide instant access to the facts (2hrs) • the full audio version of the day (5hrs) and • a comprehensive 'Reference Library' (viewable on computer only). This contains international news and research along with ready to print pdf documents and a comprehensive list of hyperlinks for access to information on the web.**

**Available for £12.00 (plus £2.50 P&P) — please use order form overleaf, from:**

# Testimonials

## **Barrie Trower (Independent Scientist) Speaker**

"I think it was the best event we have ever had and probably could be the most productive, this could be the springboard we have all been waiting for"

## **Karen Barratt (Mast Sanity)**

"Mast Sanity welcomes events like the 'TETRA and Phone Mast Forum' which gave a rare opportunity to hear a wide range of views on the technology and health risks"

## **Clive Chamberlain (Southwest Police Federation)**

"I found the Forum very interesting. It was good to hear the perceptions of other people and to hear that an awful lot of people out there are concerned about TETRA"

## **Councillor Peter Webb (North Dorset District Council) Planning and Finance**

"I formed the view that there is a trend in society for people to be exposed to rising levels of microwaves ... consequently I have initiated steps to increase the size of the rather low hurdles that the planning system puts in the way of new mast applications, particularly near residential areas"

## **Order form**

**a part of the proceeds are donated to this site**

Please make cheques payable to '**North Dorset Green Party**', and if using this order form, with **Tetrawatch** on the back.
